Personal profile

Kia Ora! I am Sharon, I am a full-stack developer who's eager to turn different creative ideas into reality. Before transitioning into the software development area, I had 5 years of experience operating a business in the field of building hardware, which has equipped me with a problem-solving skill.

I am ready and excited to embark on a technological adventure. I believe the future of business lies in digitalization, and technology is widely supported by numerous trends and developments in the business world.

" When life gives you lemons, make lemonade" is my favorite quote. I love to treat difficulties as challenges and failures as stepping stones to success in my life. In the future, I am looking forward to applying my technical and human skills to my professional technology career journey and exploring more in the world of technology.

Technical Skills

HTML   CSS   JavaScript   Typescript   React

Relevant skills and strengths

Communication and team collaboration skills

- Strong ability to be a good active listener, communicate with others and know what others need.

- Having a strong empathy to understand and feel the same as other felt.

- Being able to mediate and find out the solutions that satisfy all parties when conflict arise in a time

Organization and time management

- I have developed good time management and multiple task skills through participating in an intensive program at Dev Academy. This has enabled me to allocate various tasks effectively and complete tasks within the time frames.

- Being able to prioritize task effectively by categorizing them based on the importance and measurement of Minimum Viable Product goal.

Experience

Full stack developer for different projects at Dev Academy   **July- Oct 2023**
- Worked as full stack for project "The Crew", developing the back-end database tables and service by using Knex and JavaScript, and front-end by using React.

- Involved in various roles across different team project production, such as being a Git lead responsible for making changing and merging other work mates' code into the main branch without any conflicts, as well as being a front-end lead responsible for managing the database schema.

Hardware store owner and operator   **July 2018- July 2023**
- Liaised with suppliers, landlord, and corporate partner

- Effectively respond to customer's enquire and figure out the best solution for customer.

Account payable   **July 2017-July 2018**
- Communicated with customers and different suppliers in order to make sure all invoices paid correctly.

- Maintained more than 200 of emails everyday

Education
